

Flanged Bearing Housing

Series I-1200(00)

for self aligning ball bearing with extended inner ring

I-1200(00) - Flanged Bearing Housing

This range of flanged bearing housings is fitted with self aligning ball bearings with extended inner ring (series 112).

The outer ring of the bearing is located axially by means of a bolted on cast cover.

Flanged bearing housings series I-1200 are fitted with felt strip seals and are suitable for grease lubrication. A R1/8" grease hole is incorporated for eventual later greasing.

I-1200 flanged bearing housings are manufactured from grey cast iron.
